Luis—

Bob Traver has sent this on to me, thinking that I'm the closest to the Brinefield action nowadays so would be on top of this.

My first question was about how they can expect us to report MITs not done in the last 6 months of the current FY yet, but I see now that you've got an asterisk and footnote indicating you'd like to know about PLANS to do any in the last half of FY'11. OK.

We got all of 'ours' done in later 2009, and they would have fit into FY2010 reporting. Nothing is now planned on 'our' 9 active-wells until 2014 by us (that's 47, 48, 50, 51, 55, 56, 60, 61 & 62).

'Ours' are the brine-wells that are active for US Salt's purposes, not those being worked-with as part of the LPG Storage Project by Inergy-Midstream or re-opened, or part-way re-opened, for investigation (8 wells: 33, 34, 37, 38, 43, 44, 52, 58).

Barry Moon of Inergy-Midstream is the appropriate person to give updates on those.

If any questions just replay back.

David A. Crea, PE

Dave,

Could you help me with this one?

Bob
